

greenleader

ISE is committed to introducing environmentally responsible products that utilize pre-consumer and post-consumer recycled and recyclable materials.

GREEN LEADER is the first ever keyboard tray that is made from 100% recycled wood fiber that is also urea formaldehyde free.

All ISE Leader Series keyboard arms use 95% recycled steel and are 100% recyclable.

Using ISE's GREEN LEADER products can contribute to LEED certification due to their recycled material composition and low-emitting properties.
