

LAPTOP COMPUTER STAND

LAPTOP COMPUTER STAND

Change your laptop computing posture from risky...

... to risk free!

Conventional laptop computer usage is often accompanied by risky ergonomic posture which can result in head, neck, shoulder, and back discomfort.

The Laptop Computer Stand allows you to lift the laptop computer screen up to the perfect viewing height and angle. Connect the laptop to an external keyboard and mouse and you can then work more comfortably and productively. For even greater comfort, equip your workstation with an ISE adjustable keyboard arm and platform.

Here is what users of the Laptop Computer Stand are saying:

"I LOVE IT... before my laptop was just sitting on my desk and it was hard to see since it was sitting so far back, now with it lifted up on my new stand I can see with no problem."

Julie Thomas - Aim Consultants

"I have been using your product for almost 2 weeks and I really enjoy it. I use a dual monitor configuration and I think it helps to ease some of the neck pain I was experiencing for the last few months because I don't have to keep looking down at my laptop screen."

Brandon Soileau - Halliburton Energy Services

Front actuator button raises the stand through four height settings.

Non-slip friction pads hold your laptop firmly in place. Stand rotates on wheels 360° to allow easy access to cables.

Fits virtually all laptop makes and models. Sleek design saves desk space and promotes laptop cooling.

All ISE products are available only through contract furniture dealers.
