

MA 4000 COMPUTER-ON-A-WALL

MA 4000 COMPUTER-ON-A-WALL

MA4000BK-1-TP-CPU-WP5

In healthcare environments, computers are located close to the point-of-care.

MA4000 pole mounted arms provide a space-saving way to attach a keyboard platform, a flat panel monitor, and a CPU to a wall.

Designed to accommodate different heights of users, the keyboard platform automatically adjusts up-and-down by 6". The monitor can also be easily moved to a different height on the pole.

To meet HIPPA privacy regulations, the keyboard platform and monitor will swivel from side-to-side to hide the information being typed and viewed on the screen. For storage, the keyboard platform conveniently flips down and folds back to save space.

A CPU holder is also mounted to the pole and protects the CPU by lifting it off the floor.

SPECIFICATIONS

Model
