

**VE COPY HOLDER**  
**Height Adjustable • Angle Adjustable**

## VE COPY HOLDER

Height Adjustable • Angle Adjustable

Copy holder lets you place documents directly in-line with your keyboard and monitor, rather than to the side. This helps to improve productivity and reduces possible neck strain.

Height of the easel can be adjusted from desktop height to 5-3/8" below the desktop. This ensures that users will have a full view of the monitor.

The document viewing angle can be adjusted over a 30° range (42° to 72°) by simply repositioning the rear plate into the slotted base.

Line guide is made of semi-transparent plastic and slides smoothly and accurately across your document. The line guide can be a valuable tool in your work, ensuring fast and error-free data entry, and reducing eyestrain. It also helps to secure your documents to the easel so they will not fall off and be lost or damaged.

Copy holder is constructed from solid metal and phenolic. Non-slip friction pads anchor your copy holder firmly in place.

1" deep, rigid metal lip runs the full width of the easel. This provides support for thicker binders and manuals.

Whether you are standing or sitting at your computer, the copy holder will position your documents correctly.

The height adjustment knob is easily accessed through a large opening in the rear plate.

The copy holder can be used anywhere on the desktop. It folds flat for easy portability.

All ISE products are available only through contract furniture dealers.
