

For a free trial of the Leader Series, call your office furniture dealer or call ISE at 1-800-463-7731.

Is Stuart being productive?

...he would be with the new **Leader Series** with built in patented posture tilt indicator from ISE.

Here's a typical productive day for Stuart.

Sitting – 9:00am

"Had a good nights sleep. I'm awake and ready to conquer my day! I'll adjust my keyboard height so my shoulders stay relaxed. I need to make sure I tilt the keyboard so that the bubble in the tilt indicator is centered."

Standing – 11:00am

"My legs are getting stiff, I lift the arm and tilt the platform so that the bubble in the tilt indicator is at the bottom. I can stretch my legs while I work and still have my hands and arms comfortable. No more gossiping at the water cooler."

Recline – 2:00pm

"Lunch was great! I'm going to recline this chair back... if I tilt the keyboard towards me, I can keep working. I know my wrists won't hurt if the bubble in the tilt indicator is floating at the top."

Posture tilt indicator is centered:
Platform is configured for sitting

Posture tilt indicator is at the bottom:
Platform is configured for standing

Posture tilt indicator is at the top:
Platform is configured for reclining

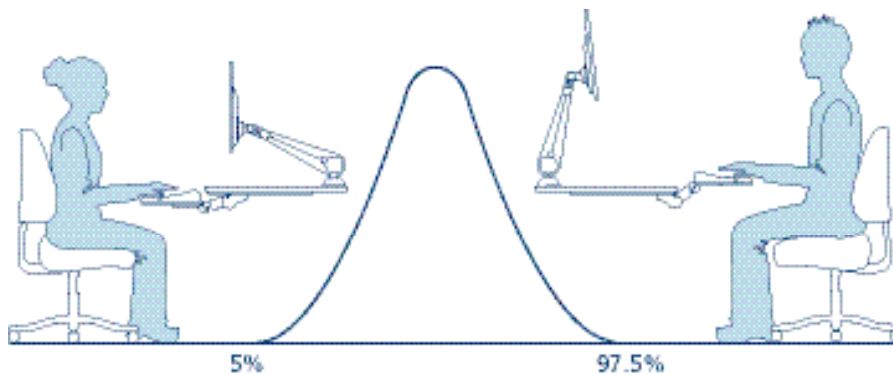

You only need the **Leader Series** to fit: any person, any configuration and any keyboard

Your one and only solution: You want to ensure that all your employees are productive whatever their desk configuration and whatever keyboard they use.

Any Person

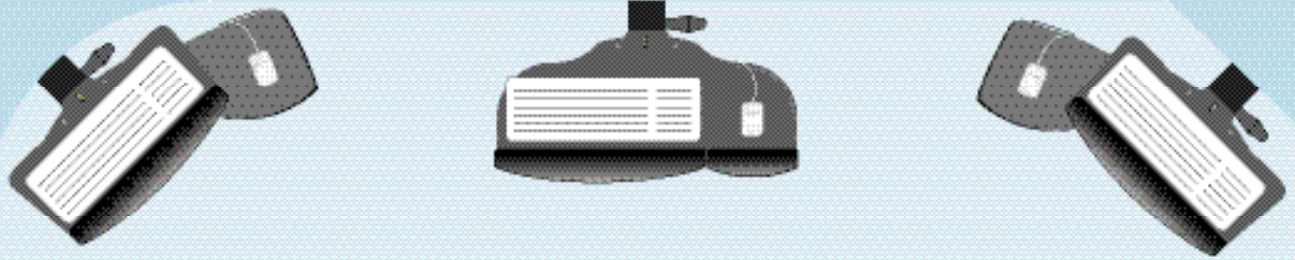

Accommodates users of varying heights:
5th to the 97.5th percentile

People come in all shapes and sizes

Not all of us can wear the same size shirts or shoes. In the same way, not all of us can be expected to be comfortable working at the same worksurface height or platform position.

The **Leader Series** is a one size fits all solution. No matter what your office desk configuration, your height or the type of keyboard you have, the Leader Series is the solution for any person, any configuration and any keyboard.

Any Configuration

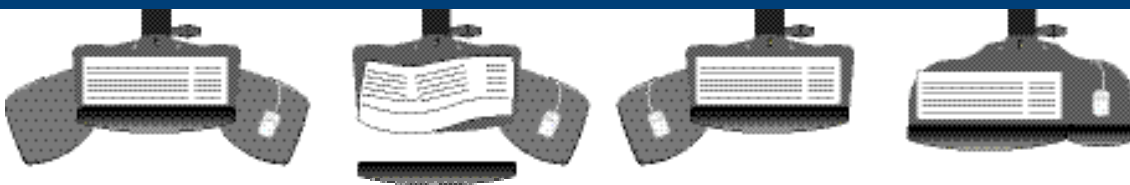

The Leader Boards fit all Configurations!

The **Leader Board** is ISE's next generation platform solution. Incorporated in every new **Leader Board** model (Swing, Skate, Swivet and Swivel) is the revolutionary **posture tilt indicator**. Other enhancements, such as increased mouse tray stability; a newly designed mouse wire; and an optical mousing surface, set **Leader Board** apart from the competition.

Coupled with the exclusive patented universal platform technology, the **Leader Board** accommodates any workstation configuration, whether it be curved, straight or diagonal.

Any Keyboard

Removable palm pad accommodates rectangular, Microsoft™ or other internet/ergo curved front keyboards.

Not only did the **Leader Series** help to make **Stuart** more productive, it can help any person in any configuration with any type of keyboard.
